Design Build Project – Bailey Landfill Wrap-Around

The City of Chilliwack undertook a major expansion of their landfill in 1997. The eastern portion of the expansion area was not tied into a leachate collection system.

- *SHA designed a gravity-based leachate wrap-around that eliminated the need for expensive pump station upgrades.*
- *Project completed by Southwest Contracting / SHA team as design-build.*
- *Project proceeded very smoothly, with work completed on schedule and within budget.*
