Capitalizing on Potential Greenhouse Gas Credits at the Campbell Mountain Landfill - Regional District of Okanagan Similkameen

- *Knowing the site would require a landfill gas collection and flaring system in the next few years, SHA prepared a short presentation for the Penticton and District Solid Waste Committee with respect to the potential to gain greenhouse gas credits from the site.*
- *Included a brief history on the development of the Kyoto Protocol and an outline of the role of the Gas Emission Reduction Trading Board.*
- *Identified the steps the RDOS would need to take to gain the credits and the methods in which credits could be traded.*
- *Clearly indicated the potential economic and political opportunities.*
